

## **Position : Front End Developer** Location – Chennai (Full time, On-site role)

We are seeking a talented Front End Developer with 3-5 years experience in UI/UX design and a strong proficiency in React.js and React Native for Web & Mobile App Development, to join our dynamic team. You will be responsible for designing, implementing, and enhancing the applications UI/UX. You will collaborate with cross-functional teams to build software solutions that drive transformational products.

### **Key Responsibilities**

- Collaborate with product management and engineering teams to define and implement innovative solutions for the product direction, visuals, and experience.
- Execute all visual design stages from concept to final hand-off to engineering.
- Conceptualize original ideas that bring simplicity and user-friendliness to complex design roadblocks.
- Create wireframes, storyboards, user flows, process flows, and sitemaps to effectively communicate interaction and design ideas.
- Establish and promote design guidelines, best practices, and standards.
- Conduct user research and evaluate user feedback.
- Identify and troubleshoot UX problems (e.g., responsiveness, navigation) and implement solutions in a timely manner.
- Stay updated on emerging technologies and industry trends in UI/UX design and frontend development.

### **Ideal Candidate**

- Strong proficiency in React.js and React Native with a good understanding of their ecosystem and accompanying tools (e.g., Redux, Enzyme, Jest).
- Familiarity with RESTful APIs, GraphQL, and asynchronous programming.
- Experience with responsive and adaptive design principles and an understanding of frontend performance optimization techniques.
- Solid understanding of web markup, including HTML5, CSS3, and CSS preprocessors such as Sass or Less.
- Proficient understanding of cross-browser compatibility issues and ways to work around them.
- Experience with version control systems such as Git.
- Experience with UI/UX design tools such as Sketch, Adobe XD, Figma, etc.
- Familiarity with Agile methodologies and continuous integration and deployment (CI/CD) practices.
- Knowledge of backend technologies and frameworks (e.g., Node.js, Express.js) is a plus.
- Portfolio of previous UI/UX design projects demonstrating creative thinking, problem-solving skills, and attention to detail.
- Excellent analytical and problem-solving skills, ability to prioritize tasks and manage time effectively, and work with cross functional teams.
